

protech hands

FACTS

- Shields skin from abrasive and harmful substances.
- Moisturises and soothes without being greasy.
- Helps prevent occupational skin conditions.
- Helps stop skin damage from repeated use of alcohol based products, gloves and hand washing.
- Dermatologist tested and proven to protect skin.
- Antibacterial.

RANGE

- 500ml pump action bottles.

ACTIVE INGREDIENTS

The active ingredient triclosan combined with liquid silicone, creates a water proof protective layer against chemical irritation and germs whilst offering a moisturising layer of protection to your hands.

Triclosan is a broad spectrum antibacterial agent used for its favourable safety profile in many personal care and health care products (eg toothpaste and soaps).

MULTIPURPOSE USES

- Hospitals
- Nursing homes
- Medical Centres
- Allied Health
- GP Rooms
- Dental
- Childcare
- Staff kitchens and canteens
- Change rooms & bathrooms
- Housekeeping and cleaning staff

DIRECTIONS FOR USE

Non greasy & easy to apply, you only require 1ml per application which is enough to protect both hands for at least 3 hours!

Apply 1ml to clean dry hands and cover thoroughly, including under the fingernails. Leave to dry and allow for absorption. For maximum protection apply before starting work. Reapply every 3 hours or as required. Suitable for use on all external parts of the body.

Protech Hands is not intended as a hand cleanser or an alternative to hand washing. It should be used in conjunction with good hygiene practices on clean dry hands as per directions for use. It is not for use in association with any medical or surgical procedure or any other therapeutic use.

HOW TO ORDER

Imagine a Barrier Cream that...

**Moisturises & soothes
without stinging**

**Protects skin from
alcohol based products**

**Does not wash off
& waterproofs
skin for 3 hours**

**Completely
non greasy**

**Helps keep
hands healthy**

**Prevents dryness
& cracking**

Advanced Skin Protection has arrived

Advanced Skin Protection is Essential in Healthcare

Why Safeguard & Protect Skin?

Repeated hand washing and use of alcohol based products is tough on skin. They strip the skin of moisture and also its protective layer compromising the skin. Keeping skin protected in line with OH&S practices and legislation is essential not only because it is law but also for personal skin protection.

The Solution → Protech Hands

Protech hands helps address occupational skin problems and minimise risks in the workplace in one. Maintaining healthy productive staff whilst assisting employers in their duty of care in the workplace.

What is SkinSure Protech Hands?

A multi purpose, waterproof skin protectant that keeps skin moisturised, soothed and protected. Proven results in the foodservice industry, beauty, mining and engineering sectors.

Protech hands patented triple action safeguards the skin for at least 3 hours with its: irritant resistant, moisturising and antibacterial properties.

Protech hands forms a breathable, waterproof and antibacterial layer on the skin. This barrier locks in moisture, stops irritants from coming in contact with the skin and helps the skin to heal itself.

Proven not to leave any residue, it stays on the skin, even between hand washing as it is waterproof.

- ✓ Shields skin from abrasive and harmful substances
- ✓ Moisturises and soothes without being greasy
- ✓ Helps prevent occupational skin conditions
- ✓ Helps stops skin damage from repeated hand washing, use of alcohol based products and gloves
- ✓ Dermatologist tested and proven to protect skin
- ✓ Antibacterial

SafeGuarding

Skin at work

Key workplace benefits

Helps address OH&S issues and skin problems at work.

- Daily exposure to harsh abrasive substances can trigger occupational skin conditions, exacerbate existing skin conditions and damage skin.
- If a staff member has dermatitis or a dry skin problem they may be unable to continue normal duties in the workplace.
- Relations in the workplace may be disrupted affecting performance and team morale.

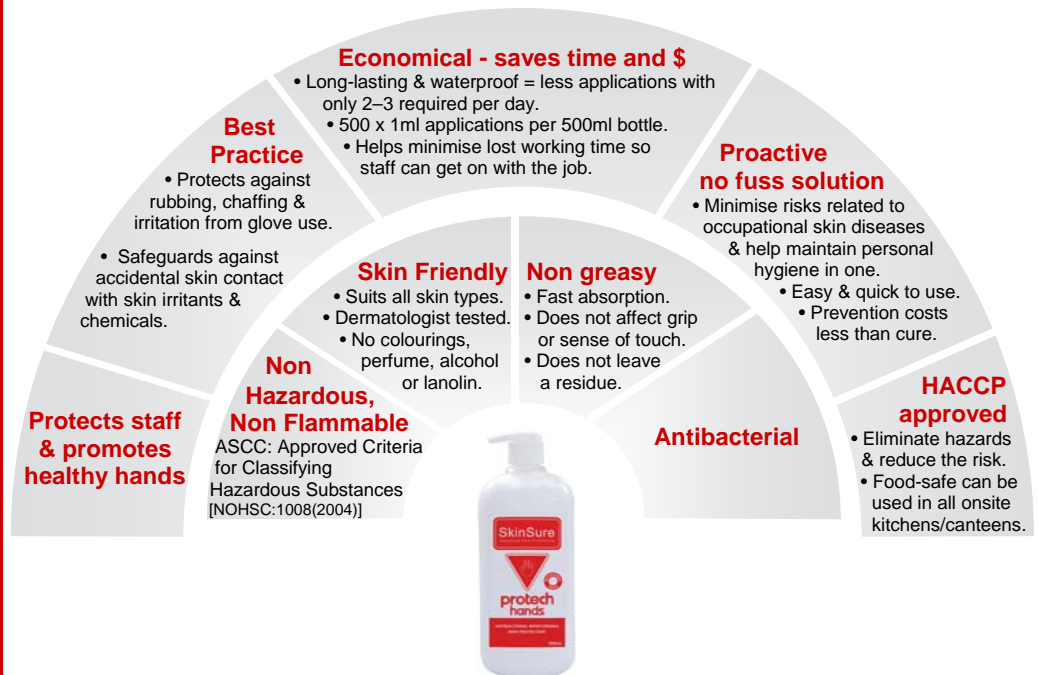

Easy solution to help employers in their duty of care obligations.

Applying **SkinSure Protech Hands** protects staff hands in 3 ways:

1. Restores the skins protective layer
2. Shields it from harsh substances and skin irritants
3. Moisturises and soothes skin

Prevention costs less than cure.
